

Offshore Special Regulations

3.03.1 Hull Construction Standards (Scantlings)

A submission from the Plan Review Committee

Purpose or Objective

The purpose of this submission is to correct the wording of Offshore Special Regulation 3.03.1

Proposal

	3.03 Hull Construction Standards (Scantlings)
Mo0,1,2	3.03.1 A monohull with a series date after 2009
Mo0,1,2	a) of less than 24 m (78'-9") L_H shall have :
Mo0,1,2	i have been designed, and built and maintained in accordance with the requirements of ISO 12215 Category A, and
Mo0,1,2	ii <u>have been maintained so that it would still meet ISO 12215 Category A, and</u>
Mo0,1,2	iii <u>have</u> a World Sailing/ ISAF building plan review certificate issued from an organisation recognised by World Sailing. Plan review certificates can be found at https://www.sailing.org .
	#

Current Position

As above.

Reasons

1. ISO 12215 does not include any instructions for maintenance, therefore the maintenance portion of the regulation as currently written is meaningless. The proposed changes correct this requirement.
