Climate change

We hear a lot about
climate change these
days. But what does it
mean to you?

Think of 1 or 2 words that
describe climate change
(what you think
it is and change)

2:00

Climate change...

Climate change refers to the shift in the Earth's usual weather conditions caused by humans over many years.

Unfortunately, our world has been getting hotter and weather more extreme (fires, floods, droughts and storms) which is affecting all our planet's habitats.

What do you think causes climate change?

SEASON 4

ENERGY REPORT

13 events
using cleaner
energy

13 S

5636

So far this season
generated: **5,636 kWh**
of renewable energy

Team EGBR
has used
3,348 kWh

3348

1467

Surplus = **1,467 kWh**
of renewable energy

The surplus energy we
generate helps power up
to 5 other teams at each
event

£ Over £1,100 in energy savings

Emirates
GBR

low carbon

*Some equivalent
statistics:*

1,804kg
CO2 avoided

Enough energy
produced to power
6,106
fridge freezers
for a day

...or enough
energy to run
1,252
tumble dryers
for one cycle

...or enough power
to make up to
150,293
cups of tea!

THIS BASE IS
POWERED BY
SOLAR AND
WIND ENERGY
